Comments: National forests have been a large part of my life growing up. They provide a place for me to escape from the toils of everyday life. As I get older I've found new ways to be able to explore and enjoy more of my backyard. One of the most important to me is ATV, dirt bike, and Snowmobile usage. They take me places where my busted knees cant carry me. They provide me the opportunity to gain a deeper respect for the forests that surround us.

Because of the ability motorized uses give me, I am able to enjoy these beautiful forests at a deeper and more respected level than ever before. I physically cannot comprehend why this is wanted to be taken away from people who care just as much about the future of the forest and this unique ecosystem we call home.
