Comments: Although I haven't been to the Gallatin Range or Absaroka-Beartooth Wilderness I have spent time in areas near there and hope to visit there for backpacking adventures which is what I travel for. Because of this I support Alternative D and further improvements such as decreasing the size of large groups of people and pack animals, closing unused grazing allotments, adding additional roadless acreage that has been already recommended, and using what little money is available to maintain present trails and not construct new trails. I appreciate the opportunity to give my input and I hope it helps keep our wild lands wild and pristine.
