Comments: Hello!

Thank you for all your efforts in managing our forests. As a Bozeman resident who recreates on my nearby public lands, they are important to me. I value running along the Sourdough Canyon Trail or mountain biking to Emerald Lake and hiking South Cottonwood. I value the scenery, the peacefulness and the nature that surrounds me while doing these activities. I support the Gallatin Forest Partnership and would like to see that proposal adopted and implemented because 1.) I think it's a good middle proposal, preserves wilderness and still maintains motorized and mechanized uses as they are today and is a proactive community-based approach to land management. I strongly believe in preventing any timber cutting (unless for wildfire mitigation), road-building or other industrial development in the Gallatin for Madison ranges.

Thank you for your consideration.
