Title:

Comments: I believe that group sizes should be limited so that all Wildernesses and forests are not harmed. Further, the forest plan should put an end to ecologically destructive fish stocking in wilderness lakes, which significantly alters the natural conditions.

I do not see that it address any feces contamination of lakes and streams on the Beartooth Plateau in the Absaroka-Beartooth Wilderness.

All vacant grazing allotments should be closed so areas can return to a wild condition.

If there are currently no trails, non should be constructed so that a wilderness area can be preserved in any, not just these areas
