Title:

Comments: Rewild America. It's the only sustainable solution. Preserving the Custer Gallatin Forest and the re-establishing the Western Wildway corridor benefits us all. Today, the rate of extinction of species is higher than anytime since the Cretaceous-Paleogene extinction event, 66 million years ago. Human depredations, habitat destruction, overpopulation, resource depletion, urban sprawl and climate change are to blame. I urge you to support the entire Gallatin Range as Recommend Wilderness in the final forest plan.
