Title:

Comments: National Forests are owned by the people, not the government. And the people of Montana should have the rights necessary to determine the use of their lands. The Federal Government is the steward of the lands to insure the lands are used the way the majority of the people in Montana think the lands should be used.....not how the bureaucrats in Washington think the land should be used. Never should the lands be denied or limited in access to the people who live and recreate in Montana!
