Comments: I am writing about the draft plan for the Absaroka-Beartooth and Lee Metcalf Wilderness areas. This plan has little direction for administering the Absaroka-Beartooth and Lee Metcalf Wildernesses. One of my biggest concerns is that the current wilderness management plans allows destructively large groups of up to 25 head of stock (horses and mules) and 15 people in most areas. Research shows that impacts increase significantly when group-sizes exceed eight head of stock and 12 people. I would hope the Forest Service would reduce group size limits accordingly so as to protect all Wildernesses on the forest from harm.

In addition, the forest plan should put an end to ecologically destructive fish stocking in naturally fishless wilderness lakes, which significantly alters the areas' natural conditions.

The plan must address the issue of human and pack animal feces contamination of lakes and streams on the Beartooth Plateau in the Absaroka-Beartooth Wilderness. Eliminating fish stocking would likely go a long way toward solving this problem, but additional measures must be included if needed.

Also Vacant grazing allotments in the Wildernesses should be closed so these areas can return to a wild condition.

No trail construction or reconstruction in the currently trailless areas of the Absaroka Beartooth and Lee Metcalf Wildernesses should be allowed. This provides remote areas for wildlife as well as premier areas for solitude.

I support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan. However, they must be improved by adding the entire 230,000 wild, roadless acres of the Gallatin Range as recommended in the final forest plan.

I would hope that the plan would prohibit all motorized and mechanized uses, and any other activities not consistent with wilderness protection, in the Recommended Wilderness areas so as to preserve their wilderness qualities until Congress acts on the wilderness recommendations.

I have spent time back packing in these areas and the preservation of the wilderness here is very important to me. Thank you for your consideration in this matter.
