Comments: I support continued mountain bike access to public lands wherever possible. While I think it's prudent to deconflict users on very popular hiking trails, I think that mountain bikers are excellent stewards of public lands through extensive volunteer work, their inherently low-impact travel methods, and significant seconomic support of rural communities that are interwoven with public lands. I do not support Wilderness designations that prohibit human powered bicycle access. Managing these areas as Backcountry areas under Alt E that allow mountain bikers to continue to enjoy our public lands is a more prudent designation. Thank you for your consideration!
