Comments: Hello,

Please keep the Crazy Mountains as a roadless place, with no development. They are both important places for the regions ecosystem and the Crow tribe. We need wilderness space. It is in the public's best interest to have wild places, and allow species like the Grizzly a further chance at successful survival. I spend a decent amount of time each year in the Yellowstone ecosystem, and that whole area is incredibly important, stunningly beautiful, and sacred.

Thank you.
