Comments: Dear Supervisor Erickson,

I strongly urge that you choose to implement Alternative D as the best possible way to achieve the Desired Conditions for Forest Vegetation as outlined in Section 2.3.10. IF lesser metrics than stated in the Objectives 01 and 01 for Alternative D (8-10 projects/decade; 800 acres/decade) are selected it is not apparent how the Desired Conditions would ever be met in a reasonable time frame. That is to say, if lesser metrics are chosen the benefits to biodiversity, old-growth, wildlife, habitats, etc. will never be achieved or would not keep pace with the numerous factors that are working to diminish the desired conditions.

Sincerely,

Don Jackson
