Title:

Comments: As a longtime (>30 years) Montana resident and frequent user of the CGNF, I am very interested in the future of the forest. My main uses of the CGNF include hiking, hunting, and fishing.

I strongly support the option that will result in the most wilderness area for the forest, so I support Alternative D.

As the human population continues to grow, these remaining wild areas will be more and more appreciated by the public, and more important for wildlife species such as sheep, elk, and wolverines.
