Comments: What a complete joke. Words cannot discribe the waisted resources spent on 1000's plus pages of garbage material in an effort to scam Americans off there land yet again. And impower hate groups such as Seirra club and others. We have been enjoying this land for many years and plan to have our kids enjoy it in the same way. Currently there is zero impact. And those that claim otherwise don't use the land anyway and mislead and lie to the contrary.. This is just another environmental scam and should be considered an act of aggressive war by those trying to steel what is public land.

Sham on anyone behind this. Is there not enough land dedicated to wilderness??
