Comments: Having given the plan thought for quite some time, I've decided to use my support for those with no voice, the animals that live in all areas of this ecosystem. Without an arguable doubt, plan D best protects the vast array of wild animals whose range is ever decreasing. I am willing to say that I feel that there are currently enough recreational areas for both motorized and non motorized vehicles. Now is the time to support those without a voice by creating the most wilderness areas possible and protecting these pristine areas to the fullest extent. In my opinion, there has never been a more crucial time to do so. Thank you.
