Comments: To Whom It May Concern;

I am writing in support of the management plan C which reflects the GFP agreement. Principally, I feel that a plan must be introduced to manage, and establish Wilderness within the Gallatin, and Madison ranges. As more people impact the area, as extraction industries become more interested protection for this magnificent area has to be put into place.

While Hyalite Canyon is one of the most used recreation areas in the Northwest, rigid guidelines and planning need to be put into place.

Sincerely,

Richard Charron
