Comments: All in all I disagree with all plans, I feel all recreation should be allowed including motorized, summer and winter. I would rather see no action, but of the plans available to choose I would pick alternative A. I don't feel any current motorized trails/roads should be closed. I feel more motorized trails/road should be created. I feel that all old trails/roads that had previously existed and have now been closed should be re-opened to public use. I feel that all trails/roads should be open to any motorized vehicle of any width, a 50" restriction is very foolish. Why does it matter how wide the trail/road is, 50" or 100" there is still a road there for all of the public to access the country that God has given us to enjoy. Specifically the Doe/Buck Creek Ridge Trail that has never been 50" until a couple years ago, it was already an established trail over 50", why did it get narrowed to 50"?

This previous comment is very true for many trails in the Gallatin Valley, and my opinion stands the same for all of them and for that matter throughout the entire state. I feel that the corridor through the wilderness between the main boulder and Cooke City should be reopened to all including motorized. Consider all of the money the state makes off of residents and non-residents from motorized and non-motorized travel throughout the state, even the money that it brings to the businesses in the state is substantial. That would all be diminished if you eliminate the areas people can recreate. I feel logging should be allowed also, to thin the forest, help prevent forest fires and provide profitable jobs to many in our state. Thank you for considering my comments and suggestions.
