Comments: Please protect the wildlife in the forest plan.

The forest plan should end the ecologically destructive fish stocking in natural wilderness lakes with any fish. Please also address the issue of human and pack animal feces contamination of lakes and streams on the Beartooth Plateau in the Absaroka-Beartooth Wilderness. Ending dish stocking would likely solve this problem. Vacant grazing allotments in the Wilderness should be closed so that those areas can return to a wild condition. Please do not have any trail construction or reconstruction in the currently trailless areas of the Absaroka Beartooth and Lee Metcalf Wildernesses because it is better for wildlife.

I support the wilderness recommendations in Alternative D of the Revised Draft Forest Plan, but please add more wild roadless areas in the Gallatin Range on the importance for the wild Gallatin Range.
