Comments: While I support preserving our lands I feel there is less benefit from preserving those lands if we cannot access them. Recently here in my area of Wisconsin the forestry service restricted travel to portions of our county forest that have been traditionally accessible via ATV. This affected less than 2% of the land and was heavily opposed during public comment periods. Yet they imposed the rule change. This is not how the democratic process works. My hope is that you listen to the people that value the same resource you are trying to protect and take action based on the feedback you receive.

Thank you for your service.

Anthony Rust
