Title:

Comments: I don't think we have much longer to protect the wilderness lands that we have. The counties surrounding this area are growing so fast that irreparable (in our lifetime !) damage is likely to be done . We have to get ahead of it, and this may be our last chance. I think there are many areas that will give wheeled access to those recreationists that want it already. Wilderness is needed to maintain the wild habitat, environment and spirit for wildlife , waters , land and people. It should not be sacrificed.
