Title:

Comments: The plan must address the issue of human and pack animal feces contamination of lakes and streams on the Beartooth Plateau in the Absaroka-Beartooth Wilderness. Eliminating fish stocking would likely go a long way toward solving this problem, but additional measures must be included if needed.

Vacant grazing allotments in the Wildernesses should be closed so these areas can return to a wild condition.

No trail construction or reconstruction in the currently trailless areas of the Absaroka Beartooth and Lee Metcalf Wildernesses. This provides remote areas for wildlife as well as premier areas for solitude.

This and more are all less expensive, less trouble and less labor than a wall to 'protect' our southern border!

Wildlife and forests have a supreme right to life as it is the original EARTH. Mother Earth doesnt need us trespassing on every piece of her wilderness. THink how we feel when someone is trampling our private back yard. There are ways for humans to enjoy the wilderness without ruining and diminishing it. God did not design nature for us to degrade it for a holy dollar.
