Comments: Dear Sir/MAdam,

I am writing in support of Alternative D as proposed in the Custer Gallatin Forest Draft Revised Land Management Plan. Option D will help to give Wilderness Designation to more area within the Forest and this is the most important tool we can use in our efforts to preserve habitat and migration corridors that support elk, deer, wolverine, grizzly, and other animals.

The uniqueness and diversity of wildlife in the larger Yellowstone region, and the Custer National Forest as a whole, merits taking it out of the regulatory limbo it has been in for the last 40 years. Its habitat is deserving of wilderness designations to ensure that that its vital importance for wildlife, and their required intact habitats with their ecological diversity will be preserved for generations to come. Please enact the management plan that can provide for that reality.

Thanks, Kelton Madden
