Comments: I wish to comment on the draft Gallatin Forest Plan. I support both the process and the recommendations of the Gallatin Forest Partnership group. Their proposal represents a breadth of public opinion, and a plan that has been carefully crafted to suit the conditions on the ground and a diversity of forest users. I believe that permanent land protections we can make today will be increasingly valuable as time goes on. For this reason I support wilderness recommendations for the Pryor Mountains and the valuable wild country surrounding the existing A-B Wilderness. Thank you for the opportunity to comment.
