Comments: I grew up in Bozeman and my experiences exploring the mountains of Montana have been unequivocally the most formative moments in my life. I now work for Montana Wilderness School where we advocate for wilderness, wildlife, and the formation of positive human/nature relationships. PLEASE help Montana youth like myself have the opportunity to experience these wild landscapes, to understand and learn from them. PLEASE implement management plans that give recommended wilderness the same protections as designated wilderness. These areas are vital habitat for a plethora of species in the GYE and also provide recreation opportunities that are deeply important to Montanans, they deserve our protection.
