Comments: While I am not a fan of revising the current plan, I have considered all options for Alternate Use plans and attended Forest Service public meetings. Alternative Plan E is the most favorable to my interests with snowmobiling, dirt biking, flyfishing, hunting and camping all over Montana.

This plan is most appealing to me because it provides the most access to us motorized users. With the increased population in the Bozeman area, there are getting to be more riders and snowmobilers than ever before.

Decreasing the amount of areas that we can ride will only increase the stress on these areas and would be detrimental to the enjoyable experience we love in the mountains. Providing the most access would put the least amount of strain on the ecosystem as well. Please consider Alternative E as the best solution moving forward.

Thank you,

Jake Green
