Comments: Please be on the right side of history and protect our dwindling wild areas.

Human beings have intruded so far into previously pristine natural areas that we must protect the areas on our only home that we still have left unsullied. It's horrifying to me that a handful of greedy corporate white men are bringing our planet to its knees. Oil and gas barons destroy clean water and wildlife habitats, big Agra like Monsanto and the glyphosate found in Round-Up poison everything, big Pharma relies on greed and human medical need to pillage low income people's earnings. WE HAVE ABOUT A DECADE TO SAVE A LIVABLE FUTURE FOR OUR KIDS! As Bill Nye the science guys said recently on Last Week Tonight with John Oliver "Wake the f#*k up!! Your not children anymore!!
