Comments: Dear Custer Gallatin National Forest,

Our country needs MORE wilderness! Too many people, and millions more on the way. We must double down on protecting nature and designate more wilderness while we still have the chance.

Please recommend to Congress at least 230,000 acres for wilderness designation under the 1964 Wilderness Act.

~~Wilderness designation protects wildlife habitat from road building, logging, motorized vehicles, and excessive human use~~

Thanks!

BTW, why are you still using "Custer" as part of the name of this national forest? Awful. It's a huge insult to Native Americans!
