Comments: One of the most important qualities about the Gallatin Range is its connectedness. One summer I took five days and backpacked from Yellowstone NP to Hyalite Canyon. I am born and raised in Montana and "spoiled" with scenic views, but there was something about walking that stretch that impressed upon me the importance of managing large swaths of forest and other landscapes for wildlife habitat, water quality, and human primitive recreation. I have read the Gallatin Forest Partnership's agreement regarding the CGNF Forest Plan, and I support the Partnership's agreement.
