Comments: Please save & protect the Custer-Gallatin National Forest !!

While I have not had the opportunity to see or explore this area (except through photographs), I do hope to one day. Still, I do have a love of and respect for Western lands and knowing the C-G Forest is there, and well-protected, matters!

PLEASE continue to preserve it as is, UNDEVELOPED, IN PERPETUITY, for the health and well-being of this great land, to continue to provide critically important environments and habitats for ALL (native) wildlife species, flora and fauna; and for the enjoyment of and by others, for generations to come.

We must act with heart and mind and foresight to save what remains of our rapidly disappearing natural lands.

Please, do not destroy that which can never be replaced.

Sincerely,

Natalie DeBoer and Family
