Comments: To protect the health of the forest, the group size of stock should be kept under 12. The plan should eliminate fish stocking as it would go a long way toward addressing the issue of feces polluting waterways. Vacant grazing allotments in the Wildernesses should be closed so these areas can return to a wild condition. No trail construction or reconstruction in the currently trailless areas of the Absaroka Beartooth and Lee Metcalf Wildernesses. This provides remote areas for wildlife as well as premier areas for solitude.
