Comments: I wish that the forest, and all the roads be opened to motorized, and non motorized transportation. I feel the forest needs better management, proper logging, and fire mitigation. I am sick of breathing smoke, and not being able to enjoy the land the way I want. I pay taxes, and on the lands I am allowed, I clean up garbage, volunteer to improve trails, and generally promote tourism. I have never had someone come from somewhere else, and ride dirt bikes on these trails, and not like it. I know several have moved here to do so. I think that a wilderness designation is a move to the past. it is not going to help us stop the fires, and provide ways to increase animal population, and health. Animals thrive in a less stressful environment, and if we did a better job of building proper habitat for them by managing the forest, and wild lands properly. We would all thrive, and there would be less disease among the animals. The only way to manage properly is by creating proper trail systems, and engaging the public. the more we are allowed to ride, the more money we will contribute.
