Title:

Comments: I am an avid hiker and a retired wildlife biologist. The Gallatin Area is very important to me since I grew up in Yellowstone and know the value of these areas to wildlife and the rest of the Greater Yellowstone Ecosystem. The protection of these areas as natural as possible is very important. I am recommending Alternative D as best to meet the protection of these natural ecosystems. We should not sacrifice any more primitive areas to bicycle or motorized recreation there is no more being made!
