Comments: I do not support any additional wilderness or recommended wilderness. The wilderness designation is used to restrict access to our public lands. Many groups of people do not have the ability to hike many miles to access lands that they love. They either do not have time or are not physically able to do so. So they use other forms of transportation to access public land. Public land should be accessible to all people, or at least as many people as possible. The forest service should be doing more to increase multiple use access and build more multiple use trails to allow access to all people.
