Comments: I oppose any new wilderness because it takes away my right to recreate in public property. False claims by so called environmentalists no longer stand by studies performed. I have lived here my entire life and the only negative things I see happening in our forests are restrictions on the public to its own land for recreation by a small well funded group. I'm fed up with this crap and anymore wilderness will make many of us recreators outlaws who will now use everything you now protect. You have pushed us far enough with your land of no use. If we can't use it, burn it to the ground next dry season. Back people into a corner far enough and you will get a response
