Comments: Alternative D is truly the only sustainable way to manage these precious lands. With the ever-growing population spiraling out of control, it is going to be absolutely necessary to have as much untouched land as possible. I personally use the wilderness for fun, health, medicine, solitude, and a chance to truly find myself. Wilderness areas will become more and more important as the population grows. Keeping these lands public and protected will help keep the outdoor recreation industry booming for millennia. Lumber, livestock, and mining are all temporary industries that can't last through the next generation while the outdoor recreation industry will always provide for the people. Lets keep it wild, our grandchildren will thank us!
