Comments: To whom it may concern,

I am writing to express my support for Alternative E. I actively hunt and fish in Montana's wilderness and appreciate the qualities it has to offer. I also enjoy spending time recreating on snowmobiles and 4 wheelers. One thing I've noticed over the years is that wilderness is increasing and areas for motorized recreation has shrunk dramatically. I also want to point out that overall average for motorized recreation is more important than miles of trails, I especially enjoy snowmobiling and off trail riding is what makes the mountains so spectacular. I don't want to see the lands available for this type of recreation continue to shrink. My family has also ranched in Montana for 5 generations, this being said I must also state my support for alternative E in regards to current livestock grazing. Alternative E keeps important decision making local, where decision makers are familiar with Montana's economy, the issues with bison and cattle interactions, and how to conserve Montana's greatest resource, our land. Please consider my support for alternative E.
