Comments: I support Alternative E, due to the fact that it allows multiple uses of public land. Specifically I support this plan because it would allow motorized and mechanized recreation in the Hyalite-Buffalo Horn-Porcupine wilderness study area, if the restrictions on this area were lifted by congress.

I believe National Forest should be made available to multiple forms of recreation, not only hiking and horseback riding. In particular I think that snowmobiling, dirtbiking, and mountain biking should be allowed on all National Forest land, as these activities have minimal impact, and provide a way for a wide range of people to enjoy our public lands.
