Comments: I support the MWA recommendations concerning the Absaroka-Bearrooth Area specifically the no mechanized or motorized recreation allowed. After backpacking and camping throughout this area I really appreciate the great expanse that left untouched by motorized vehicles and contributes to a true wilderness experience that this area offers.

I also support the MWA recommendations concerning the Gallatin and Madison ranges and more specifically the Gallatin forest partnership agreement. I support the expansion of wilderness ensuring north-south connectivity. This area is very important as it serves me and my community as a place that lets us enjoy nature and the wilderness all close to home.
