Comments: Please keep the Crazy Mountains as they currently are, protecting current roadless areas. I graduated from Reed point, Mt and have lived in Billings for most of my adult life. The Crazy Mountains, even when I am not hiking in them, are this majestic presence that puts me in awe and makes me be thankful to be alive. My family and I have hiked the Crazy Mountains many many times, and we enjoy being able to see them even from Rapelje. There are so many roads already everywhere, and so few roadless areas, it is imperative that we preserve these few roadless areas that are left so that future generations can also enjoy them. The short term benefit to few that arises from destroying natural areas cannot justified turning the planet into a road mess that none can enjoy. I certainly hope we are not the generation that destroys mt, and that this forest Service generation is not the one that destroys the last few roadless areas in the Crazy Mountains. Please designate them as Wilderness Area preserving and including the present roadless areas.
