Comments: I believe it is important to protect land and implement land management techniques to allow sustainable recreation in correlation with thriving ecosystems. I am concerned with the proposed plan as it may reduce recreational opportunities, resulting in other areas becoming heavily populated. In my experience when there is limited space and land for recreation it results in threats to the land and ecosystem due to extensive travel. I also see a concern for increased illegal activity, such as secret bike trails due to limited access. If the plan does prevent recreation, I believe there needs to be significant thought of increasing access to recreation in alternative ways. I'm not saying the plan should not go into effect, but I think there are concerns with any significant change.
