Comments: Hello,

I do not support any more roadless areas than there currently are. I propose to decrease the number of acres that are currently under such protections. As a fourth generation born Montana resident, growing up working in the construction and timber industry, as well as performing structure portion for fires, roadless areas make it more difficult to protect the safety of the residents and visitors of Montana.

This is pitched to be a proposal that is palatable for all users, there is nothing further from the truth. All proposals remove something from motorized users other than do nothing. There is so much land that is not accessed currently under roadless rules that increasing access would alleviate density at other places.

I emphatically urge all to consider all user groups and to not change the CGFP in any way. Many small communities rely on the income provided by the diverse user group that recreate in OUR lands and would be decimated by these proposals.

Sincerely,

A disheartened disenfranchised minority,

MJC
