Title:

Comments: The Absaroka Beartooth as well as the Madison, Henry's Lake, and Gallatin Geographic areas are some of the most environmentally valuable places in the forest. The new forest plan must protect them from growing recreational and climate change impacts. Please cement our recreational footprint in place through the Gallatin Forest Partnership's recommendations, including - 130,000 acres of new wilderness. In addition, protect existing wilderness and recreational hubs by extensively monitoring and managing the growing impacts of recreation and climate change.
