Title:

Comments: target range project

It seems to me after reading the long document that it makes more sense to require the nearby gun club, which is on public land, to be open to the public. Why make a new area when an area nearby already exists. This does the most to mitigate any potential damage. It makes no sense to me as a taxpayer to allow a private club to control access to public land. Perhaps they have a contract, but if they do it should be open at some point to renegotiation. If this new target range is approved, at least don't repeat the mistake of allowing the club to restrict public access.

Sincerely,

Jeanne Barsanti

Watkinsville, GA 30677
