Title:

Comments: We own property which abuts the National Forest in one of the areas identified in the Scoping Letter. We are also equine enthusiasts as well as cyclist and hikers and are obviously concerned with the proposed actions. While we support the objectives as outlined in the Scoping Letter, execution and interpretation is everything in a project such as this. The Scoping Letter is far too general to understand exactly what the outcome will be. We have seen prior results which have not been favorable. While we have have some good discussions with Barry Garten, we would like to see further discussion to elaborate and flesh out exactly how and on what timetable the project would be executed.
