Comments: Hello, We own the property at 478 Big Brush Creek Road, Fries and notice that one of the project areas borders our property for a good ways. It includes pretty much all of the area that we hike on behind our house. The trail (old road bed) that follows the ridge behind the house meanders on and off Forest Service property. We are very concerned as we don't know what to expect but feel it will be a drastic change to our surroundings. We hope that a buffer zone will be considered. We look forward to working with you folks through the planning process since as adjacent land owners we have an interest in the forest around us.
