Comments: As a citizen of Ouray County for 36 years, I feel protective of the beautiful mountain landscapes in our area. I hope that your support will help to keep these special places protected as wilderness for future generations. I am happy that the Whitehouse addition to the Mount Sneffels Wilderness has been found by the forest to have high wilderness characteristics. The other four areas proposed as wilderness by the Community Conservation Proposal have been extensively studied, and found to be worthy of wilderness designation. Areas that conflict with existing uses have been left out of the proposal. Please lend your support to this designation.
