Comments: my comments are regarding rivers contained within the Grand Mesa, Uncompahgre and Gunnison Forests. Please ensure you protect these rivers to the extent possible. As far as water quality and access. I am an avid whitewater kayaker who has paddled many of these rivers over the years and this provides many of us an amazing high quality experience. People want these rivers protected and also to have their right to float/paddle these rivers also protected for their use and for future generations. Thanks, Michael Smith
