Comments: ATV Trails

Widening the OHV trails to 64 would allow most side by side to be able to ride the trails. I love riding Wayne National forest and have for years. However unable to take my side by side there. Which limits our ability to take our younger children with us. So they can ride with us safety. My kids love being in the woods. Most of the trails and bridges are already wide enough for these vehicles. Except two bridges that I am aware of and both of them have drive-around capability. Most of the roads around Wayne National forest are ATV friendly already. I would be more then willing to help with this transformation.
