Comments: The 10,000 acres that is from Ophir to Black Bear proposed to be non-motorized should not happen because

(1) there are mining claims in that section and the claim owners need access to them 365 a year. (2) I have been over snow traveling sense 1992. (3) There is heli-sking taking place in that section also and I'm pretty sure that is motorized. If we shut his down to motorized how will mountain rescue get there to help if someone gets hurt ( non- motorized)

We need 3 different plans (1) this proposal (2) leave it as is (3) more motorized

Thanks for your time

Mike Masker
