Comments: The 10,000 acres that is from Ophir to Black Bear proposed to be non-motorized should not happen because

(1) there are mining claims in that section and the claim owners need access to them 365 a year. (2) I have been over snow traveling since 1992. (3) There is heli-skiing taking place in that section also and I'm pretty sure that is motorized. If we shut this down to non-motorized how will mountain rescue get there to help if someone gets hurt (non-motorized)

We need 3 different plans (1) this proposal (2) leave it as is (3) more motorized

Thanks for your time

Mike Masker
