Comments: Dear GMUG,

I encourage you to revise the oil and gas leasing map (Grand Mesa, Uncompahgre, and Gunnison National Forests Forest Plan Revision Map 1 - Oil and Gas Leasing Decision (May 15, 2017)) to include a "no leasing option" for areas marked on Grand Mesa, Uncompahgre, and Gunnison National Forests Forest Plan Revision Map 7 - Geohazards as unstable slopes, landslides, rockfall, avalanche, flash flood, high ground water, other "potential problem for mining" and "none mapped". These areas are dangerous and present too high a risk to water contamination when open to oil and gas leasing.

I also encourage you to revise the oil and gas leasing map (Grand Mesa, Uncompahgre, and Gunnison National Forests Forest Plan Revision Map 1 - Oil and Gas Leasing Decision (May 15, 2017)) to remove leasing options on any land that is designated "general roadless" and "upper tier". These areas are critical habitat for wildlife and include many trails and other recreation areas that will be destroyed by the presence of hydraulic fracturing.

Thank you for your hard work and dedication in protecting our public lands!
