Comments: The plan provides little or no protection of important resources. More required mandatory protections need to be included.

Harvesting timber would be allowed in critical lynx habitat. This is very wrong!

The scope of this plan is limited. There is much more land that needs protection that meets the criteria for wilderness designation.

There is no mandatory protection for big game on their birthing grounds. Voluntary compliance is worthless.

The plan proposes to establish conservation watershed networks to protect watersheds and sensitive species. However no detail is given and that needs to be more than a suggestion.

Thank you for this opportunity to comment on this most important plan. The idea is great but it needs some teeth.
